University of La Laguna

Sep 2021 – Jul 2025

Tenerife, Spain

- Ranked 5th in class
- Final Thesis: 9/10 — Internship grade 10/10
- Relevant Coursework: Financial Management; Project Evaluation; Microeconomics I–III; Macroeconomics I–III; Econometrics; Time Series Analysis; Statistics; Company Valuation
- Thesis: Empirical analysis of gold prices and gold mining equities (2006–2025), with applications to risk assessment and portfolio diversification

PROFESSIONAL EXPERIENCE

Binhex System Solutions

Business Analyst Intern

Mar 2025 – May 2025

Tenerife, Spain

- Acted as a key member of the finance support team, contributing analytical work, market research, and internal materials that informed strategic decision-making and supported the company's international expansion initiatives into the US market.
- Conducted in-depth market and competitor analysis across the company's business lines, supporting the preparation of investor-facing and internal documents under NDA.
- Built and monitored internal KPIs to assess the company's financial and operational performance, contributing to a broader diagnostic of efficiency and growth bottlenecks.
- Supported the analytical and administrative follow-up of two financing agreements (under NDA), including documentation preparation, data validation, and coordination with internal stakeholders.

ACADEMIC PROJECT

Relationship Between Gold Prices and the Stock Performance of the Gold Mining Sector (2006–2025)

- Conducted advanced quantitative and statistical analysis on long-term financial market data, identifying patterns related to market behavior, risk dynamics, and expectation setting.
- Delivered findings relevant for investment decision-making and portfolio considerations, demonstrating strong analytical rigor.
